

BRAVO

Shorter programming time, longer battery life

You can program Bravo in a moment: the code is transmitted from one remote control to another in a few seconds. It also functions over a long period: the 12V battery provides longer-lasting life.

Choose Bravo if you want to reduce programming time and increase the life of your remote control.

- Made with resistant materials.
- Functions perfectly in any conditions.
- Supplied with 12V batteries.
- Features a good range.
